A three-legged tower for fun and games

The tower will challenge the motor skills of children aged from 3-4 years. A rope ladder leads up to the triangular non-slip platform, which has a floor height of 140 cm. From here, you can whizz down the slide, which provides lots of excitement, while also helping children to understand cause and effect. You can stand in front of the window with the coloured panes, and watch the action on the ground in red/yellow colours.

Learning from throwing

Under the tower is a play panel with target holes and scores. This gives children the opportunity to develop competitive games and train their linguistic and mathematical skills through play.

LEDON Castle is your guarantee of a high-quality playground

- Designed in cooperation with children to ensure the highest possible play value
- Developed using materials that require low maintenance
- Made in Denmark
- Short delivery times
- We prepare detailed design proposals to show what your new playground will look like.
- The entire Castle series is approved by TÜV SÜD in accordance with the latest EN 1176 standard
