Motor challenges for all ages

Lynette features non-slip steps and a climbing wall panel for accessing the platforms. It takes both balance and coordination to cross the swaying bridge between the two towers. Cross-coordination is required when both sides of the brain have to work together, for example when learning to read and write. The Lynette play environment is full of motor challenges for young children at all stages of development.

Fun and games and motor challenges

Lynette is a play system offering lots of play and challenges. Featuring a slide, a climbing panel and a lookout barrel with a movable telescope, Lynette sets the scene for many hours of fun in the playground. The popular activities in the Castle series bring children's motor skills into play while unleashing their imagination in a true knight's castle universe.

LEDON Castle is your guarantee of a high-quality playground

- Designed in cooperation with children to ensure the highest possible play value
- Developed using materials that require low maintenance
- Made in Denmark
- Short delivery times
- We prepare detailed design proposals to show what your new playground will look like.
- The entire Castle series is approved by TÜV SÜD in accordance with the latest EN 1176 standard
