SIA is the price-conscious model in LEDON Explore

The Explore universe has playground equipment for every need. Sia is the smallest model in the **Explore series**, but still offers scope for challenges and fun. The short rope ladder extends up to the tower, which has a floor height of 90 cm, from where you can look out across the playground or zoom down the slide. Underneath is a small den, where the diamond panel encourages concentrated play and stimulates fine motor skills.

Sia is a compact play system

With its triangular floor, Sia is suitable for areas with limited space. Sia requires an area of 6.2 x 4.2 metres. The fall height is 90 cm, so Sia should ideally stand on grass. However, this is not always recommended, as grass soon wears out, and the ground becomes too hard to function as a suitable safety surface. The system is designed for children from about three years of age, and the non-slip floor ensures that even the smallest feet stand securely.

LEDON Explore is your guarantee of a high-quality playgrounds

- Designed in cooperation with children to ensure the highest possible play value.
- Developed using materials that require low maintenance and with natural colours.
- 100% Danish-produced
- Short delivery times

100% Danish-produced and low maintenance materials ensure that the playground equipment is safe and durable.
