

Inspection & Maintenance Services

for your play area

Undertaking inspections and repairs
on any manufacturers play equipment

Our Services

Here at OLP (formerly Fenland Leisure Products) we have a dedicated maintenance team to give your playground or outdoor fitness area a full service using our own employed and fully qualified maintenance engineers and in-house support team.

With 30 years of experience in the industry we have both the knowledge and expertise in assessment, maintenance and repairs.

We also offer an inspection service carried out by RPII (Register of Play Inspectors International) qualified engineers who check that all equipment complies to the British & European standards of BS EN1176 & EN1177 for Commercial Playgrounds and EN16630 for Outdoor Fitness Equipment.

- RPII qualified engineers
- In-house support and quotation team
- No obligation repair quote
- Quick personal service
- In-house production facility dedicated to manufacturing panels, decks, roofs and nets
- Over 3000 parts in stock using our Online Playgrounds spares service.

FAQs

- **Does my play area need to be inspected?**

The European Standard for Playground Safety, BS EN1176 recommends that regular inspections take place as part of a planned inspection schedule.

- **Can I carry out a playground inspection myself?**

Yes, you can carry out visual level inspections yourself. We recommend you attend a playground visual inspection training course before you attempt this. Operational and Annual Inspections must be carried out by a RPII certified engineer.

- **Do you inspect/repair any manufacturers equipment?**

We are qualified to inspect and repair any manufacturers equipment.

- **Can you undertake repairs or supply parts?**

Yes, all our Operational Inspection reports are followed by a no-obligation quotation for the works identified. This work can be undertaken on a supply and install basis or parts only.

- **Can you provide me with a quotation for repairs following an inspection by another company?**

Yes we can, provided the report contains good quality photographs showing the work which needs to be carried out. Where this is not possible, we can arrange for a Maintenance Technician to attend site to identify the parts which need replacing.

- **Can safety surfacing be repaired?**

We can repair all types of surfacing from Safagrass, Rubber Mulch, loose fill surfaces such as sand and bark through to rubber wetpour.

Inspections Explained

VISUAL ROUTINE INSPECTION

This can be carried out by a grounds maintenance member of staff (we recommend they attend a playground visual inspection training course – contact us for details) and consists of a simple visual check to ensure equipment is safe to use. These types of inspections should be recorded with all found hazards being reported for further action.

OLP can help produce a site specific checklist.

OPERATIONAL INSPECTION

These are the key inspections that we offer from our fully qualified team. They look in more detail at the condition of the equipment,

providing a quality control check on the visual routine inspections and identifying wear and tear to the equipment. They should be carried out on a quarterly basis as a minimum and we will follow up with a detailed web-based report from our latest inspection software. This will list the findings in an accurate and easy-to-read format, always compliant with the latest safety legislation.

All reports are supplied with a full risk assessment which is an essential document when managing a public play space.

ANNUAL INSPECTION

These are to be carried out by an independent specialist not connected with the playground operator or owner. They will essentially look at vandalism, wear and tear, long term structural problems and the overall safety of the playground. If required, we can arrange for these inspections to be carried out through our network of independent RPII Annual Inspectors.

25 - Very High Risk	
Item: Activity Equipment - Monkey Bars Manufacturer: Owners/Operator Surface Type: Bark Mulch Equipment Compliance: N/A Surface Area Compliance: N/A Part/Part Number:	
Finding 1 The timber on this item has severe rot - Remove and replace all affected timber sections	Finding 2 There is some evidence of rot in the timber - Monitor for any further deterioration and replace as required

18 - High Risk (Finding 4)	
Item: Activity Equipment - Multi Play (Junior) Manufacturer:	Risk Level: H - High Risk Surface: Wet Pour
	
Finding: The chain links are worn in excess of 40% and require retesting	Action: Replace worn chains

Refurbishment

Here at OLP we can repair, refurbish or replace your broken playground equipment. Whether it is rotten timbers, damaged steel, frayed nets or worn-out HDPE we can help by either carrying out the refurbishment ourselves or sending the parts for your in house team to fit.

Replacement Nets & Ropes

We also repair and manufacture replacement nets and ropes, so whether you are looking for a climbing net, Burma Bridge or simple rope we can help.

These 16mm steel core ropes come in a variety of colours and meet British and European safety standards. They can either be replaced by our maintenance team or supplied complete with fixings for your own team to install.

Gates

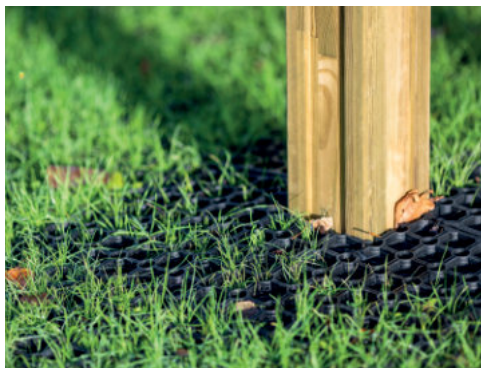

Gates are vitally important in any play area to keep children safe. We can source any part required to maintain your gates, or if for any reason they are beyond economical repair we can supply or install new ones for you.

Surfacing

From Wetpour, Rubber Mulch and Safagrass to Artificial Grass, Bark and Sand there isn't a surface we can't lay or repair! Using premium grade products, we can give your outdoor space the safety surface it requires based on the critical fall heights of the equipment installed.

One of the most common problems is unsightly and dangerous gaps around the edge of wetpour caused by the rubber contracting over time. Our team can cut back and replace this to eliminate trip hazards and bring it back up to scratch.

Case Study

GOREFIELD PLAYGROUND

Following an inspection our maintenance team swung into action over a very hot week to give this playground a £30,000 face lift. We repaired various pieces of equipment, refurbished roundabouts and swings, replaced ropes and shackles, resurfaced with both wetpour and fibre fall and replaced a timber that had been strimmed.
