A small area requirement and an ascent via stairs

In the Basic series, you will find play systems in many different varieties. Bard is one of the smallest play towers with stairs, a slide and a floor height of 90 cm. Do you want the same model, but with a more challenging ascent via a rope ladder? Then have a look at our **LB100 Birk** play tower.

Bard gives you the most basic play activities for a small playground area, but at the same time it has one of the elements which brings the most excitement at a playground – the slide.

Stairs lead the children to the floor of the play tower, from where they can enjoy the view of the rest of the playground before gathering up the courage for a trip down the slide. This model is especially suitable for younger children as the stairs ensure that even children at the age of two can enjoy the trips down the slide. Here they can easily move up the steps and grab hold of the handles on the sides.

High-speed fun and learning

Rutsjebanen er en velkendt favorit på legepladsen, som børnene sjældent får nok af. De gentagne rutsjeture bringer dog ikke kun smil og glæde frem, de er også med til at forbedre børnenes grovmotorik og balance. Ligeledes bliver de klogere på at bedømme afstand og fart, ligesom de også får en fornemmelse for tyngdekraften.

Why choose LEDON basic?

- All the basic elements you need for a good-quality budget-priced playground.
- Compact towers, which require little space.
