## Exciting climbs and a play zone for the youngest children

Benja is one of our four two-tower play systems that are filled with play activities for both younger and older children. This model has a floor height of 140 cm and 190 cm, respectively, as well as a climbing wall and a climbing net, which challenges the older children. At the bottom of one of the towers, there is a play panel for the younger children, which invites games such as role play. These two play zones make it possible for several groups of children to play at the same time without disturbing each other. Do you want a simpler model without play zones? Then have a look at our **LB270 Billie** play system.

The Benja play system has two towers that are connected by a climbing net. The connection is made even more fun and challenging, as the offset placement of the net results in the children having to go through the green frames in the net in order to go from one tower to the other. This different way of accessing the towers that includes both a slide and sliding poles makes the upper part of the system suitable for older children.

Down below sits the play panel which is perfect for younger children. The play panel is designed with a small counter and an abacus, which is ideal for role playing. Over the counter, the children can sell mud pies and other goods from the shop, and while they are stimulating their imagination and creativity, the role and negotiation plays also help to develop their language.

## Children's development through play

The Benja play panel also has movable parts in the form of the abacus. The movable parts are not only a fun part of the game, but it also exercises the children's fine motor skills. The fine motor skills have to be stimulated in order for the children to achieve skills such as

### Specifications

**Article number**  
LB260

**Product dimensions (LxWxH)**  
531 x 265 x 272 cm

**Area requirement incl. safety distances (LxW)**  
817 x 591 cm

**Max. fall height**  
264 cm

**Recommended ages**  
From 4 years

**Approximate installation time**  
2 persons 10 hours

### Why choose LEDON:

Quality produced in Denmark

Play equipment co-developed with children

Low-maintenance playgrounds

Sustainable materials

EN 1176-certified by TÜV
