OUR SERVICES

Choose FLP as your
Maintenance Provider!

Its what we do...

We have a dedicated maintenance team at FLP to give you a full service using our own employed maintenance engineers and in-house support team.

With 24 years experience in the playground industry, we have the knowledge and expertise in assessment, maintenance and repair.

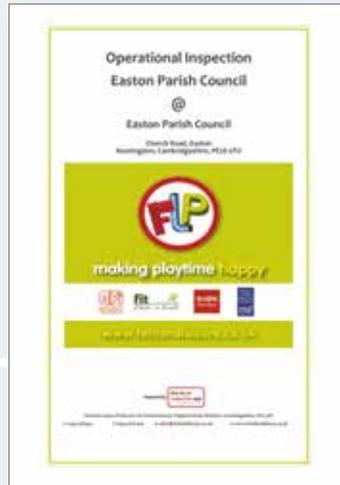

All inspections are carried out by RPII (Register or Play Inspectors International) qualified engineers who check that all equipment complies to the British & European standards of BS EN1176 & EN1177 for Commercial Playgrounds and EN16630 for Outdoor Fitness Equipment.

- > RPII qualified engineers
- > In-house support and quotation team
- > No obligation repair quote
- > Quick personal service
- > In house production facility dedicated to manufacturing panels, decks, roofs and nets
- > Over 3000 Parts in stock using our Online Playground Spares service

INSPECTION SOFTWARE:

We use the latest inspection software which securely retains inspection records whilst onsite and provides accurate reporting without room for misinterpretation. Designed to streamline the inspection procedure whilst ensuring findings are reliable and always compliant with the latest safety legislation. All reports are supplied with a full risk assessment which is an essential document when managing a public play space.

INSPECTION REPORTS:

Alternatively we can provide you with a concise quotation using the inspection report you have been given from other independent inspectors – simply send FLP the report and we shall generate a no obligation quotation for repair works.

QUALITY CONTROL:

FLP is synonymous with quality, with over 60,000 square feet of factory, warehouses and offices in Cambridgeshire. This means everything from product design, manufacturing, warehousing and installation operations are in one place ensuring we have total quality control in everything we do.

FREQUENTLY ASKED QUESTIONS

? Does my Play Area need to be inspected?

The European Standard for Playground Safety, BS EN1176 recommends that regular inspections take place as part of a planned inspection schedule.

? Can I carry out a Playground inspection myself?

Yes you can carry out visual level inspections yourself. We recommend you attend a playground visual inspection training course before you attempt this. Operational and Annual Inspections must be carried out by an RPII certified engineer.

? Do you inspect/repair any manufacturer's equipment?

We are qualified to inspect and repair any manufacturer's equipment.

? Can you undertake repairs or supply the parts?

Yes, all our Operational Inspection reports are followed by a no-obligation quotation for the works identified. This work can be undertaken on a supply and install basis or parts only.

? Can you provide me with a quotation for repairs following an inspection by another company?

Yes we can, provided the report contains good quality photographs showing the work which needs to be carried out. Where this is not possible we can arrange for a Maintenance Technician to attend site to identify the parts which need replacing.

? Can safety surfacing be repaired?

FLP have a dedicated team of maintenance engineers on hand to repair all types of surfacing from Safagrass, Rubber Mulch, loose fill surfaces such as sand and bark through to rubber wetpour and tiles.

TYPES OF INSPECTION EXPLAINED!

VISUAL ROUTINE INSPECTIONS

This can be carried out by your grounds maintenance member of staff (we recommend you attend a playground visual inspection training course) and consists of a simple visual check to ensure equipment is safe to use. These types of inspections should be recorded with all found hazards being reported for further action.

OPERATIONAL INSPECTIONS

Looking in more detail at the condition of the equipment; providing a quality control check on the more regular inspections and identifying wear and tear on the equipment.

Such inspections should be carried out by an appropriately trained member of staff or alternatively by a suitably qualified specialist and should be recorded. These inspections should be carried out on a quarterly basis as a minimum. Fenland Leisure Products can carry out these playground inspections for you.

All reporting is managed via our unique web-based playground inspection software, providing you with easy access to all relevant site information.

ANNUAL INSPECTIONS

To be carried out by an independent specialist not connected with the playground operator or owner. Essentially looking at vandalism, wear and tear, long term structural problems, standards compliance and design, along with risk assessment. This report covers the overall safety of the playground.

If required we can arrange for these inspections to be carried out through our network of independent RPII Annual Inspectors.

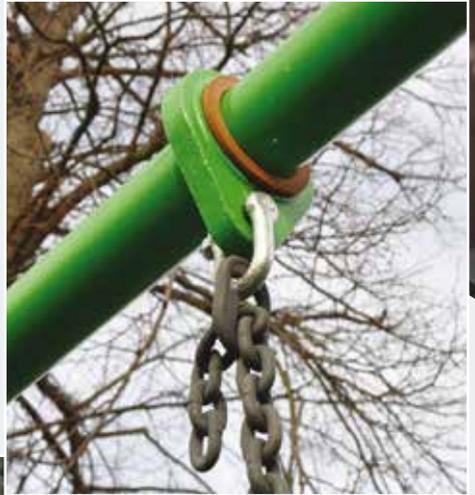

SPARE PARTS

We have an in-stock supply of original regularly replaced parts from most major manufacturers!

Whether it be a Wicksteed Keylink, Record Shackle or a Sutcliffe Swing Seat we can supply it for you usually from stock. Swings are always a popular part of any playground and as a result parts do wear so contact us for hangers, bushes, shackles, chains, seats and even re-paint services!

REFURBISHMENT

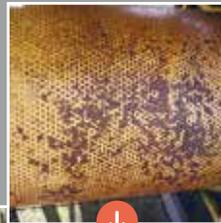

FLP specialise in the manufacture of timber in our Cambridgeshire based Workshop, whatever size, whatever shape we can re-create it!

Our team will measure and create the exact replacement to prolong the life of your wooden play equipment.

For metal equipment we can carry out on-site welding, repainting and even

re-powder coating components providing a bright new finish and prolonging the life your equipment.

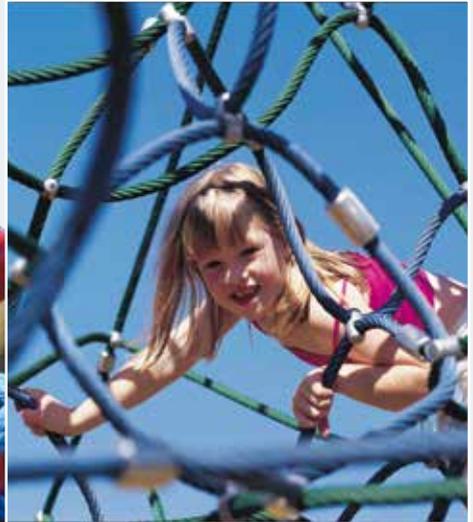

REPLACEMENT NETS & ROPES

We also repair and manufacture replacement play nets too, from simple ropes to climbing nets and large activity nets up to 6m high.

Nets are supplied in a variety of colours complete with attachment points to suit your design or existing equipment. All nets are manufactured from 16mm steelcore combination rope using our 150 tonne hydraulic press and connected using colourful polymer joints.

Our in-house design team will draw the replacement to millimetre precision, these can then be either fitted by our maintenance team or supplied complete with fixings for your own team to install.

SURFACING REPAIRS

From Wetpour, Resin Bonded Rubber Mulch, Safagrass, Artificial grass, Bark, Sand and shingle there isn't a surface we can't lay or repair!

Using premium grade products, we can give your play area the safety surface it requires based upon critical fall heights of the equipment installed.

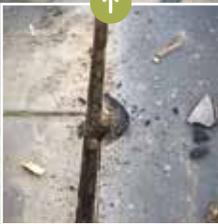

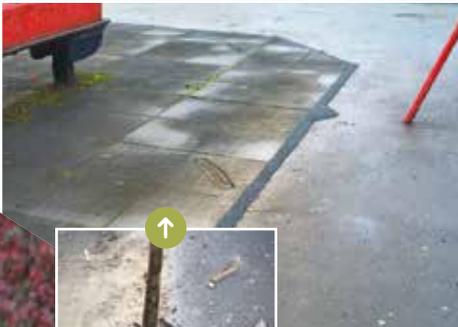

EDGE REPAIRS - PLAYGROUND SIGNAGE

Wetpour / Tile Edge Repairs – due to its natural makeup rubber will contract and lose elasticity after a period of time causing unsightly and dangerous gaps around edges.

Our team have the know how to cut back and replace to eliminate trip hazards and bring your playground surfacing back up to scratch.

FLP utilise our in-house design team to create signage of your choice, it can be simple contact details to complex trail locations!

Give our team a call with your brief and we can create the sign for you.

GATES & SKATE PARKS

Gates are vitally important in any play area and play a massive part in childrens safety.

We have the ability to source any part required to maintain your gates or if for any reason they are beyond economical repair we can install new ones for you.

Skate Parks are very popular and as a result have heavy use!

We can also maintain these areas for you, whether it be a rivet, graffiti removal or a new skatelite panel, we can fit it!
